

## TITLE I

This is the time of the year when we determine the number of students eligible to receive Title I service based on a poverty index formula. We use this Title I money to give supplemental help in **reading, math, and language arts to any St. George child who needs it.** To qualify for Title I services, all participating non-public schools are required to provide the Department of School Support Services with the poverty data necessary to determine the Title I allocation for our school. **This information is kept confidential.** Remember that the more students who qualify the more money our Title I program will receive.
